High-quality Exam Torrent & Valid Test Dumps & Reliable Guide Torrent

Exam : **VCPC610**

Title : VMware Certified Professional
6 - Cloud

Vendor : VMware

Version : DEMO

NO.1 A user needs to modify the threshold value of the Fault badge within vCenter Operations Manager.

What should the administrator do to enable the user to complete this operation?

- A. Add the vCenter Operations Manager Admin privilege on the user in vCenter Server.
- B. Modify the user's rights from the Access Rights tab.
- C. Modify the group's rights from the Account tab.
- D. Add the Adjust Badge Thresholds privilege on the user in vCenter Server.

Answer: A

NO.2 An administrator deploys vCenter Operations Manager for an environment consisting of 5,200 virtual machines.

The appliance begins collecting data from the environment.

A week after deployment, when the administrator tries to connect to the user interface, a 404 error is displayed.

What is the most probable cause for the error?

- A. The UI virtual machine is out of memory.
- B. The UI virtual machine is out of disk space.
- C. The Analytics virtual machine is out of memory.
- D. The Analytics virtual machine is out of disk space.

Answer: D

NO.3 An auditor needs a list of all events from the last six months.

Company policies do not allow the auditor to login to the system.

How can the administrator give the auditor the events required?

- A. From the Recent Events screen, export to a HTML page.
- B. From the Recent Events screen, export to a csv file.
- C. From the Audit Log screen, export to a csv file.
- D. From the Audit Log screen, export to a HTML page.

Answer: C

NO.4 An administrator needs to limit CPU resources for a vCloud Automation Center Business Group.

What should the administrator do?

- A. Create a Reservation that includes a vSphere Resource Pool that limits CPU utilization.
- B. Create a Reservation and specify CPU limits in the This Reservation field.
- C. Create a Reservation and specify a Reservation Policy that limits CPU utilization.
- D. Create a Reservation that enables Alerts based on CPU utilization.

Answer: A

NO.5 An administrator is attempting to create an entitlement for the HR active directory group.

However, when entering the group name in the Users and Groups search field, no results are returned.

Why is this occurring?

- A. The HR active directory group is not a member of the selected business group.

- B. The HR active directory group contains no user accounts.
- C. The HR active directory group does not have any roles assigned in vCloud Automation Center.
- D. You can not add active directory groups to an entitlement.

Answer: A

NO.6 An administrator creates a vCAC virtual machine blueprint with the following resource parameters:

A user tries to launch a machine based on this blueprint with the following resource parameters:

What is the immediate outcome of this attempt?

- A. The virtual machine fails to launch.
- B. The virtual machine is launched as configured.
- C. The virtual machine deployment awaits administrative approval.
- D. The virtual machine launches with automatically adjusted parameters.

Answer: B

NO.7 The vCloud Automation Center administrator has created a vSphere blueprint that will be added to the Service Catalog. However, when the administrator attempts to add the blueprint to the Service Catalog, the blueprint is missing from the catalog items view.

What is required for the blueprint to show in the catalog items view for the administrator?

- A. Log out of vCloud Automation Center and log back in.
- B. Assign the administrator as a Support User for the Business Group.
- C. Assign the administrator as a Business Group Manager for the Business Group.
- D. Publish the blueprint from the Infrastructure tab.

Answer: D

NO.8 A virtual machine is receiving a large number of network packets, which is affecting the performance of other virtual machines connected to the same virtual network.

What should the vSphere administrator do to resolve the issue?

- A. Migrate the virtual machine to a standard switch that has been configured for ingress traffic shaping
- B. Configure the distributed switch to which the virtual machine is connected for ingress traffic shaping
- C. Migrate the virtual machine to a different port group on the same distributed switch
- D. Enable Network I/O Control on the standard switch to which the virtual machine is connected

Answer: B

NO.9 Which two conditions could be used for VXLAN transport? (Choose two.)

- A. Multicast on physical network
- B. Proxy ARP must be enabled on the first hop router.
- C. Unicast with a NSX controller cluster
- D. Auto-RP must be configured on the first hop router.

Answer: A,C

NO.10 An administrator has configured multi-pathing using an FC array in an active-active configuration.

What is the expected behavior of the host when a failed preferred path becomes available using the Fixed path selection policy for this array type?

- A. It automatically reverts to the preferred path.
- B. It continues using the current path until it is manually reverted.
- C. It resumes load balancing across all available paths.
- D. It reverts to the preferred path after the host has been restored and rebooted.

Answer: A

NO.11 An administrator is deploying vSphere using a NAS device as the shared storage system. The administrator has already created a VMkernel port, enabled the NFS client, and configured a mount point accessible to the hosts.

Which additional configuration is required before the datastore can be used to create virtual machines?

- A. The ESXi hosts must have root access to the datastore.
- B. The NAS must support NFS version 4.
- C. Port binding must be configured on the VMkernel port.
- D. The MTU on the VMkernel port must be set to 9000.

Answer: A

NO.12 The storage administrator is preparing an action plan to upgrade a Fibre Channel storage array. The current plan will result in extended downtime for a VMFS LUN that is part of a SDRS cluster.

What two steps can be taken in a vSphere 5 environment to minimize the impact of the downtime? (Choose two.)

- A. Ensure there are multiple active paths to the LUN
- B. Ensure DRS is configured properly
- C. Use Storage vMotion to migrate the affected VMDKs
- D. Place the datastore into maintenance mode

Answer: C,D

NO.13 An administrator reviews the resources and performance for a Provider vDC and discovers that an ESXi host's resources are not being used. Further investigation reveals that the ESXi host's resources are not being used at all despite sufficient overall demand.

Which two conditions could cause this issue? (Choose two.)

- A. The ESXi host has been assigned to conflicting Organization vDCs.
- B. The ESXi host has been disabled from within vCD.
- C. The ESXi host has not been prepared as a vCD host.
- D. The ESXi host has been claimed by conflicting Provider vDCs.

Answer: B,C

NO.14 Which three actions should an administrator take before creating a vCloud Automation Center

Business Group? (Choose three.)

- A. Identify the Active Directory distribution groups for the users.
- B. Determine which users will be assigned the Business Group Manager role.
- C. Identify the Active Directory security groups for the users.
- D. Determine which Cost Profiles will be used for the users.
- E. Identify the Distinguished Name of Containers where the Users and Groups for the Tenant are located.

Answer: B,C,E

NO.15 A vSphere administrator needs to add a CPU to a virtual machine, but upon editing the VM settings the option is grayed out.

What would explain this behavior?

- A. The virtual machine is running
- B. The virtual machine has been configured with a CPU limit
- C. CPU Hot-add has not been enabled on the virtual machine
- D. The virtual machine is in a resource pool with no available CPU resources

Answer: A
